

# MANAGED SERVICE PROVIDER

*Shift the time-consuming burdens of troubleshooting, upgrades, backups, and device management to Servpac and focus more on your business.*

## Customized solutions to meet your unique needs and budget:

### Managed Network

Access ongoing security and business continuity support, without the heavy investment in resources and equipment.

- All network equipment deployment, configuration and management
- Support remote access data from anywhere and any device
- Enterprise firewall with anti-virus and anti-malware to secure your data
- Customized security awareness training, including phishing and password best practices

### Managed IT Services

Partner with an experienced team of IT support and engineers to manage your day-to-day technology operations and put the focus back on your business.

- Full servers and desktop management includes system and application updates, security configuration and monitoring
- Microsoft 365 deployment for businesses with high security requirements, such as Financial, Health Care and Professional Services, including email, OneDrive, Sharepoint Online and Teams
- Security audit and best practices implementation
- Application and hardware license management and renewal
- Implementation and support of multi-layered security solutions including: encryption, business continuity and threat management
- Server uptime and resource monitoring
- Disaster recovery and data backup development and management

## Managed SD-WAN

Connect multiple office locations to mission-critical data and applications with ease.

- Full architecture development and implementation of network design
- Increased resiliency through multiple carriers
- Fast deployment and ability to adapt to cloud applications
- Customized configuration of mission-critical traffic and applications to improve network performance
- Ongoing monitoring, support and maintenance
- Third party carrier integration and management

## The Servpac Advantage

### ALL-IN-ONE VENDOR

Reduce the hassle of dealing with multiple vendors and avoid finger-pointing among multiple providers.

### CUSTOMIZED SOLUTIONS

Scalable and fully-featured network solutions that covers your unique requirements.

### PROFESSIONAL MANAGEMENT

Backed by a team of Network Engineers with decades of experience, plus 24x7x365 on-call support.

### NO HARDWARE INVESTMENT

No need to buy expensive hardware to set up your network. Everything – including equipment – is part of Servpac's monthly fee.
